May 2025 – Present

- Managed official communication, announcements, and documentation for the student branch.
- Coordinated event-related updates and supported smooth execution of technical and social programs.

### Volunteer, STI 2025 (Science, Technology & Innovation Summit)

- Assisted multiple committees including Food, Publicity, and Transport, ensuring efficient event coordination.
- Helped manage guests, logistics, and on-site tasks to maintain smooth event operations.

## Technical Skills

**Frontend:** HTML5 | CSS3 | JavaScript | TailwindCSS | DaisyUI | ReactJS | React Router | React

Hook Form | React Query

**Backend:** Backend: NodeJs | ExpressJs | Rest API | Firebase Authentication | MongoDB

**Tools & Platforms:** VS Code | Git | Figma | Netlify | Vercel

## Projects

### ❖ IEEE GUB Student Branch Website

I am currently contributing to the IEEE Website project – a Next.js and Tailwind CSS-based platform for managing and showcasing IEEE events and activities. [Live Link](#)

- Modern UI: Built with Next.js and Tailwind CSS for a clean, responsive design.
- Event Management: Browse Event Management: Browse upcoming events with details such as date, time, and registration link.
- Dynamic Content: Event listings and details are managed via context-based state.
- Role-Based Sections (Future Scope): Planned dashboards for Admin, Moderator, and Members.

### ❖ Student and class management - An online platform where people can learn skills

**Features of this project:** Admin - admin@gmail.com password: 123456A! [Live Link](#) | [Client Site](#) | [Server Site](#)

- User Authentication (Firebase): Secure registration and login for all users.
- Teacher Role (Admin Approval): Users approved as teachers can add, update, and delete courses. Courses become visible only after admin approval.
- Course Enrollment & Payment: Students can enroll in courses by paying the listed price.
- Role-Based Dashboards: Separate dashboards for Admin, Teacher, and Student, each with role-specific features.

### ❖ Community Food Sharing Platform

**Features of this project:** [Live Link](#) | [Client Site](#) | [Server Site](#)

- User Authentication (Firebase): Secure and efficient login/registration system.
- Food Donation Management: Logged-in users can add, update, or delete food donations.
- Tracking & Requests: Users can manage donations in My Food and track requests in My Request.
- Food Pickup: Donated food can be collected at the location specified in the food card.
- Request Handling: Donors can view how many people requested their food and accept requests accordingly.

## Language

Fluent in BANGLA, full working knowledge of ENGLISH and good understanding of HINDI.
